If you’re interested in a profession that can improve and enrich lives, start your future at Syracuse University’s Falk College. The College’s seven programs provide the environment and experiences you need to succeed in a career that will have a lasting effect on the well-being of individuals, families, and communities.

**Majors**

- Child and Family Studies*
- Food Studies
- Nutrition and Dietetics
- Nutrition Science*
- Public Health*
- Social Work
- Sport Management
- Undeclared

You’ll also take coursework in the liberal arts, allowing you to gain the critical thinking, communication, and analytical skills that impress employers.

*Most popular majors for students interested in a pre-med or pre-health major.

**Related Careers**

- Athletic Director
- Child Life Specialist
- Community Program Director
- Food Co-op Director
- Health Specialist
- Mental Health Therapist
- Nutritionist
- Public Health Educator
- Sports Marketing Director
- Wellness Coordinator

**Combining Majors**

Pursue a double major or a minor within Falk or combine your Falk major with one from SU’s eight other undergraduate colleges. A few examples:

- Majors: Social Work and International Relations
  Career: International Relief Coordinator
- Majors: Sport Management and Public Relations
  Career: Sports Information Director
- Majors: Public Health and Management
  Career: Community Health Administrator

*On the Cover:* Public health students meet with their internship supervisor to discuss an SU Health Services Flu Clinic.

Reputation
Falk’s Social Work program was ranked #8 by USA Today (2015). Upon graduation, you’ll be prepared to complete the master of social work (M.S.W.) at Falk or other advanced standing programs in the country, which means you can get your M.S.W in 10 months instead of two years.

Test scores that exceed national averages
Falk’s pass rates for required nutrition credentialing exams consistently exceed national averages. In 2014, 100 percent of Falk students passed the registered dietician (RD) exam.

Prepare for careers that answer society’s needs
Because of increased attention to healthy lifestyles, disease prevention, food policy, aging populations, and diet-related disease epidemics, there is strong demand for Falk graduates of nutrition, food studies, and public health programs. A Falk major offers pathways to advanced degrees in emerging fields, including global health, marriage and family therapy, food studies, and addiction studies to prepare you for leadership roles with national and global organizations.

Build your resume before you graduate
With input and guidance from faculty, Public Health majors design an individual project in a public health agency or other professional setting, making a difference in the community even before they graduate.

Graduate job-ready
Professionally credentialed advisors will help you customize your courses and fieldwork. Hands-on learning, in many cases right on campus, plus your internship help ensure job placement.
Study Abroad...or in Cities Across the United States

Broaden your perspective, learn to challenge assumptions, and begin to develop a worldview beyond your own cultural experience.

Take advantage of one of many study abroad opportunities, such as studying the Mediterranean diet in Florence, history of the Olympics across Europe, or community health in South Africa.

From the Spring Break in LA Sport Management Program to the Mirken Roots of American Social Work NYC immersion trips, learn and network in cities key to your future profession.

“Urban Food Systems, taught by Professor Evan Weissman, centered around a semester-long project that involved working with community members. This was a great opportunity—it was awesome being a part of a class that felt like so much more than just a class.”
— Anna Delapaz ’17, Food Studies and Nutrition

“The Falk College prepared me for my graduate studies at George Washington University, where I am now finishing an administrative fellowship at Christiana Care Health System. I hope to help communities access health care services and make sure they receive them in an equitable way.”
— Andres Moreira ’12, Public Health

“I’ve taken classes in cooking fundamentals, management strategies, the sciences, and health—all of which have exposed me to different aspects of the nutrition industry. This helped me focus on the kind of job I wanted. I feel prepared and excited for the next stage in life.”
— Mary Briggman ’15, Nutrition Science
